COURSE DESCRIPTION
Responding to the increased familiarity with endoscopic skull base surgery, we have modified the program to start at a higher level of expertise, with live endoscopic skull base surgery being performed at the conclusion of the program. We recognize the value of reinforcing basic concepts, and that our course aims to address a variety of learners with varying levels of experience. Therefore, we will provide the participants with a series of live endoscopic skull base surgery. These procedures will allow the participants to benefit from the hands-on experience of both a traditional lecture course based on anatomical and technical concepts, and a hands-on interactive experience combining decision-making and disease-oriented discussions. Participants will witness both courses, a lecture course and the hands-on course without additional costs.

The course comprises:
1. Pre-course video lectures: The basic principles of endoscopic skull base surgery, anatomy of the sinonasal tract and skull base, and basic surgical techniques and instrumentation. These will be provided to registered participants one month prior to the course, as the program will start at a level that presumes familiarity with these principles.
2. Anatomical presentations (video presentations will be provided one month prior to the course).
3. Laminated dissection manuals (digital version will be provided one month prior to the course).
4. Sequence of complementary didactic lectures, rounds tables and panel discussions (open format with audience participation).
5. Live surgery will be transmitted directly to the auditory where the participants may interact with the surgeons and other members of the faculty.

COURSE OBJECTIVES
At the conclusion of this activity, learners should be able to:
1. Describe the anatomic relationships of the sinonasal tract, orbit, and ventral skull base from the endoscopic perspective.
2. Discuss the indications and limitations of endoscopic skull base surgery of the skull base, pituitary fossa, orbit, and craniofacial junction.
3. Identify how to avoid and treat complications of endoscopic skull base surgery of the skull base, pituitary fossa, orbit, and craniofacial junction.
4. Describe the anatomic relationships and surgical exposure afforded by the transperineal approach.
5. Describe the relative anatomical exposures of the endoscopic versus the open transcranial approaches.
6. Identify how to avoid and treat complications of endoscopic skull base surgery.

THE OHIO STATE UNIVERSITY FACULTY
Ricardo L. Carrau, MD, FACS
Bradley A. Otto, MD
David M. Provenzale, MD

THE OHIO STATE UNIVERSITY COMPREHENSIVE CANCER CENTER–JAMES CANCER HOSPITAL AND SOLOVE RESEARCH INSTITUTE
May 14-16, 2015 Columbus, Ohio

Target Audience
Neurosurgeons, otolaryngologists-head and neck surgeons and other skull base surgeons who are interested in learning endoscopic endonasal surgery of the skull base, pituitary fossa, orbit, craniofacial junction.

Field of View Values

Target Audience Neurosurgeons, otolaryngologists-head and neck surgeons and other skull base surgeons who are interested in learning endoscopic endonasal surgery of the skull base, pituitary fossa, orbit, craniofacial junction.
COURSE DESCRIPTION
Responding to the increased familiarity with endonasal endoscopic skull base surgery, we have modified the program to start at a higher level of expertise, entailing didactic presentations related to treatment algorithms of specific diseases. However, we recognize the value of reinforcing basic concepts, and that our course aims to cater to participants with a variety of levels of training and experience. Therefore, we will provide the participants with a series of video lectures and video-prosections to fulfill these needs. This video lecture series will allow the participants to enjoy the benefits of both a traditional lecture-style course based on didactic and technical concepts, and a course with an interactive format emphasizing decision-making and disease-oriented discussions. Participants will in fact enroll in two courses, a home study course and the hands-on course without additional costs.

The course comprises:
1. Pre-course video-lectures addressing the basic principles of endoscopic skull base surgery, anatomy of the sinonasal tract and skull base, and basic surgical technique and instrumentation. These will be provided to registered participants one month prior to the course, so the participants will start at a level that presumes familiarity with these principles.
2. Anatomical prosections (videos will be provided one month prior to the course).
3. Laminated dissection manual (a digital version will be provided one month prior to the course).
4. Sequence of complementary didactic lectures, round tables and panel discussions (open format with audience participation), 3-D anatomical reviews and hands-on cadaveric dissection.
5. Live surgery will be transmitted directly to the audience where the participants may interact with the surgeons and other members of the faculty.

At the conclusion of this activity, learners should be able to:
1. Describe the anatomic relationships of the sinonasal tract, orbit and ventral skull base from the endoscopic perspective.
2. Discuss the indications and limitations of endoscopic endonasal surgery of the skull base, pituitary fossa, orbit and craniocervical junction.
3. Identify how to avoid and treat complications of endoscopic endonasal surgery of the skull base, pituitary fossa, orbit and craniocervical junction.
4. Describe the anatomic relationships and surgical exposure afforded by the transsphenoidal approach.
5. Describe the relative endonasal exposure of the endonasal versus the open transcranial approaches.
6. Identify how to avoid and treat complications of endoscopic skull base surgery.
7. Sequence of complementary didactic lectures, round tables and panel discussions (open format with audience participation), 3-D anatomical reviews and hands-on cadaveric dissection.

A course based on didactic and technical concepts, and a course with a new interactive format emphasizing decision-making and disease-oriented discussions. Participants will in fact enroll in two courses, a home study course and the hands-on course without additional costs.

The course comprises:
1. Pre-course video-lectures addressing the basic principles of endoscopic skull base surgery, anatomy of the sinonasal tract and skull base, and basic surgical technique and instrumentation. These will be provided to registered participants one month prior to the course, so the participants will start at a level that presumes familiarity with these principles.
2. Anatomical prosections (videos will be provided one month prior to the course).
3. Laminated dissection manual (a digital version will be provided one month prior to the course).
4. Sequence of complementary didactic lectures, round tables and panel discussions (open format with audience participation), 3-D anatomical reviews and hands-on cadaveric dissection.
5. Live surgery will be transmitted directly to the audience where the participants may interact with the surgeons and other members of the faculty.

At the conclusion of this activity, learners should be able to:
1. Describe the anatomic relationships of the sinonasal tract, orbit and ventral skull base from the endoscopic perspective.
2. Discuss the indications and limitations of endoscopic endonasal surgery of the skull base, pituitary fossa, orbit and craniocervical junction.
3. Identify how to avoid and treat complications of endoscopic endonasal surgery of the skull base, pituitary fossa, orbit and craniocervical junction.
4. Describe the anatomic relationships and surgical exposure afforded by the transsphenoidal approach.
5. Describe the relative endonasal exposure of the endonasal versus the open transcranial approaches.
6. Identify how to avoid and treat complications of endoscopic skull base surgery.

A course based on didactic and technical concepts, and a course with a new interactive format emphasizing decision-making and disease-oriented discussions. Participants will in fact enroll in two courses, a home study course and the hands-on course without additional costs.

The course comprises:
1. Pre-course video-lectures addressing the basic principles of endoscopic skull base surgery, anatomy of the sinonasal tract and skull base, and basic surgical technique and instrumentation. AGENDA

One month before the course, we will provide all registered participants with the following lectures in a video format. Participants will be responsible to watch these videos and be familiar with the material. The course will start at a level that assumes familiarity with the concepts exposed in the videos.

Day 1:
- Welcome – Ricardo Carrau, Bradley Otto
- Coronal Plane Modules
  - 8:00 AM Round Table: Preoperative Planning: Diagnostic and Interventional Imaging
  - 9:00 AM Round Table: Creation and Evolution of a Skull Base Surgery Center
  - 9:15 AM Round Table: Cranial Nerves and Intracranial Complications
  - 10:00 AM Round Table: Surgical折术Beliefs and Adjunctive Techniques
  - 11:00 AM Challenges in Reconstruction of the Skull Base
  - 12:00 PM Lunch
  - 1:00 PM Prevention and Management of Complications Optimizing QOL
- 2:00 PM Guilt for Dissection
- 2:15 PM Anatomical Dissection
- 3:00 PM Anatomical Prosection: Sagittal Plane II – Trans-planum, Trans-cribiform
- 3:45 PM Round Table: Chordomas and Chondrosarcomas
- 4:15 PM Panel: Dilemmas with Meningiomas of the Anterior Cranial Base: Endonasal or Transcranial
- 5:00 PM Course Dinner

Day 2:
- 7:30 AM Round Table: Optimizing the Surgical Corridors and Adjunctive Techniques
- 8:00 AM Lecture: 3-D Endoscopic Skull Base Anatomy: Coronal Plane – Trans-orbita
- 8:15 AM Round Table: When the First Choice is the Best and Maybe the Only Chance
- 9:00 AM Endocrinological Considerations
- 9:15 AM Round Table: Anatomy of the Cranial Nerves and Cerebral Circulation
- 10:00 AM Round Table: Anatomy of the Sinonasal Tract & Skull Base (Extradural) /The Sinonasal Corridor
- 11:00 AM Lunch
- 12:00 PM Technologies: Robotic Applications in Skull Base Surgery – Focus One: What’s New in Imaging and Optical Technologies
- 12:45 PM What’s New in Imaging and Optical Technologies – Technical Update

Day 3:
- 7:45 AM Day 3-Trans-orbital Endonasal Approaches
- 8:15 AM Anatomical Prosection: Trans-orbital Approaches
- 9:00 AM Anatomical Prosection: Nasal Approaches
- 9:45 AM Anatomical Dissection
- 10:00 AM Guideline for Dissection
- 11:00 AM Anatomical Dissection
- 12:00 PM Anatomical Prosection: The Sagittal Plane: The Maxillo-mandibular Fossa and Trans-orbital Approaches

ADDITIONAL INFORMATION

For technical accommodations, call 805-404-1914, Monday–Thursday 8:30 AM–5:00 PM. Visit the course Web site at www.academiceventmanagement.com for more information.

AGENDA

Monday, September 8th

8:00-9:00 Breakfast Buffet

9:00-10:00 Welcome and Introductory Remarks – Ricardo Carrau, Bradley Otto, Daniel Prevedello

10:00-10:15 Break

10:15-11:45 Course Overview – Ricardo Carrau, Bradley Otto, Daniel Prevedello

11:45-12:45 Lunch - 12:30-1:30

Afternoon Session

1:30-2:30 Interactive Panel All Faculty & Attendees

2:30-3:00 Day 1 – Sagittal Plane EEA Modules I: Trans-sellar, Trans-planum, and Trans-cribiform

3:00-3:15 Break

3:15-4:00 Welcome Reception

4:00-5:00 Day 1 – Coronal Plane Modules

Tuesday, September 9th

8:00-9:00 Breakfast Buffet

9:00-10:00 Day 2 – Coronal Plane Modules

10:00-10:15 Break

10:15-11:45 Urology – Ricardo Carrau, Bradley Otto, Daniel Prevedello

11:45-12:45 Lunch - 12:30-13:30

Afternoon Session

13:30-14:30 Interactive Panel All Faculty & Attendees

14:30-15:00 Day 2 – Coronal Plane Modules

15:00-15:15 Break

15:15-16:45 Practical Approach to Imaging of the Cranial Base

16:45-17:00 Day 2 – Coronal Plane Modules

17:00-17:30 Course Adjourned

Wednesday, September 10th

8:00-9:00 Breakfast Buffet

9:00-10:00 precisionSkin

10:00-10:15 Break

11:00-11:45 3-D Endoscopic Skull Base Anatomy: Coronal Plane – Ricardo Carrau, Bradley Otto, Daniel Prevedello

11:45-12:45 Lunch - 12:30-13:30

Afternoon Session

2:30-3:00 Anatomical Dissection

3:00-3:15 Break

3:15-4:00 3-D Endoscopic Skull Base Anatomy: Trans-sellar, Trans-planum, and Trans-cribiform

4:00-4:45 Moderator: Amin Kassam, Bradley Otto, Wouter Van Furth, Christos Georgalas.

5:00-6:00 Open Forum – All Faculty & Attendees
AGENDA
One month before the course, we will provide all registered participants with the following lectures in a video format. Participants will be responsible to watch these videos and be familiar with the material. The course will start at a level that assumes familiarity with the concepts exposed in the videos. In addition, we will provide copies of the prosection videos, a dissection manual in PDF format, and references. Although not critical, we encourage the participants to go over this material before the course.

FRIDAY, MAY 15, 2015 – DAY 2
7:00 am Commercial Breaks
3:00 pm Break
3:05 pm Video Lectures
3:45 pm Round Table: Coronal Plane Modules
4:30 pm Round Table: Sagittal Plane Modules II
6:00 pm Course Dinner
7:00 pm Commercial Breaks
7:30 pm Video Lectures
8:15 pm Round Table: Coronal Plane Modules
9:00 pm Interactive Panel: All Faculty & Attendees
11:00 pm Interactive Panel: All Faculty & Attendees
SATURDAY, MAY 16, 2015 – DAY 3
7:00 am Commercial Breaks
3:00 pm Break
3:05 pm Video Lectures
3:45 pm Round Table: Sagittal Plane Modules II
4:30 pm Round Table: Interactive Panel: All Faculty & Attendees
6:00 pm Course Dinner
7:00 pm Commercial Breaks
7:30 pm Video Lectures
8:15 pm Round Table: Coronal Plane Modules
9:00 pm Interactive Panel: All Faculty & Attendees
11:00 pm Interactive Panel: All Faculty & Attendees

PAYMENT
Check enclosed payable to: Academic Event Management
Mail: 320 West 57th Street
New York, NY 10107

ACCREDITATION STATEMENT
The Ohio State University Center for Continuing Medical Education (CME) is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

AMA CREDIT DESIGNATION STATEMENT
The Ohio State University Center for Continuing Medical Education programs in this activity are compliant with the criteria set forth in the current versions of the ACCME and ACCP guidelines. Please claim only the credit corresponding with the extent of your participation in the activity.

ACCOMMODATIONS
Accommodations are available in a variety of price ranges. To reserve a hotel, please call 1-888-421-1442 and mention “Endoscopic Skull Base Surgery Course” to get a special rate of $140 per night plus taxes. Cutoff date to get the special rate is April 22, 2015. Hotel Reservations can be made online as well. Please call the Hyatt Regency Columbus at (800) 842-1111 for reservations and to receive the special rate. All non-refundable reservations are guaranteed. The Hyatt Regency Columbus is located on the Right.

CANCELLATIONS
This course is supported in part by educational grants from the following companies at press time: KARL STORZ Endoscopy-America, KLS Martin Group, Medtronic, NICO Corporation, Stryker.

Registration
State-of-the-Art Endoscopic Skull Base Surgery
May 14-16, 2015
Hyatt Regency Columbus
350 N High Street - Columbus, OH 43215
Tuition: $3250
$500.00 deposit is due with registration. All payments must be made by check or money order. ATTN: Cancellation Policy:
1. Invoices received after February 20 are subject to a $200.00 processing charge. 2. Invoices not paid on or before February 20 will be subject to a $200.00 processing charge. 3. Failure to attend course will result in full payment of course registration. 4. In the event that a registrant cancels more than 30 days prior to the course date, a full refund will be issued. 5. In the event a registrant cancels less than 30 days prior to the course date, 50% of the course registration fees will be refunded. 6. In the event that a registrant is unable to attend the course after registration has been completed, the registrant will be responsible for all expenses associated with attending the course. 7. In the event that the course is delayed or canceled, the registrant will be reimbursed for all expenses associated with attending the course.

New York, NY 10107

One month before the course, we will provide all registered participants with the following lectures in a video format. Please ensure we are ready to watch these videos and be familiar with the material. The course will not be at a level that assumes familiarity with the concepts exposed in the videos: Pre-course Principles of Expanded Endoscopic Endonasal Approach
Pre-course Surgeons – 1:00
9:00 am Continental Breakfast
9:15 Course Introduction
9:45 Break
10:15 Break
10:45 Presentation: Optic Nerve and Oculomotor Function
11:15 Challenges in Reconstituting the Skull Base
12:00 Lunch
12:30 – 1:30 Skeletal Prosection: Trans-sphenoid
1:00 Round Table: Surgical Navigation
1:30 Round Table: Endoscopic Endonasal Approaches
2:00 Lab 1
2:15 Guideline for Dissection
2:30 Anatomical Dissection
3:00 Anatomical Prosection: The Sagittal Plane: The Nasoseptal Flap and Trans-sellar
3:15 Interactive Panel All Faculty & Attendees
6:15 End of Day
8:15 Evening Social
9:00 pm Course Adjourns
The Ohio State University seeks to make sure this conference is accessible to all. If you have a disability that might require special accommodations, please contact Pat Fitzwater at 805-300-9154.
In accordance with the Americans with Disabilities Act, The Ohio State University Center for Continuing Medical Education (CCME) is committed to providing equal access to its services, programs, and activities. If you need assistance to participate fully or have any other questions regarding your obligations under the Americans with Disabilities Act, please contact Pat Fitzwater at 805-300-9154.

For hotel accommodations, call 1-888-421-1442. Mention “Endoscopic Skull Base Surgery” to get a special rate.
To register, please complete the registration form below and mail or fax to:
KARL STORZ Endoscopy-America, KLS Martin Group, Medtronic, NICO Corporation, Stryker.
All paid registrations will be processed within 2 business days of receipt. A confirmation email will be sent automatically. All cancellations must be received in writing. No refunds will be made after the cancellation deadline (as stated above).

The conference will be held at the Four Seasons Hotel, 200 Convention Center Drive, Columbus, OH 43215.

The Ohio State University Center for Continuing Medical Education designates this live activity for a maximum of 40.5 AMA PRA Category 1 Credit(s)™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

The Ohio State University Center for Continuing Medical Education (CCME) is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

ACCREDITATION STATEMENT
The Ohio State University Center for Continuing Medical Education (CCME) is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

AMA CREDIT DESIGNATION STATEMENT
The Ohio State University Center for Continuing Medical Education program on the course “Endoscopic Skull Base Surgery” includes the specialty of neurosurgery, the specialty of otolaryngology, and the specialty of plastic surgery. The ACCME considers only the extent to which the credit commune with the inherent opportunities of the participants in the activity.

For hotel accommodations, call 1-888-421-1442. Mention “Endoscopic Skull Base Surgery” to get a special rate of $150 per night plus taxes. Call before the rate special ends on April 15, 2015.

EXPANDED FORMAT

Pre-Course
Including Lectures Video

State-of-the-Art Endoscopic Skull Base Surgery
A HANDS-ON COURSE

COURSE DIRECTORS

SPONSORED BY

May 14-16, 2015
Columbus, Ohio

Ricardo L. Carrau, MD, FACS
Daniel M. Prevedello, MD
Bradley A. Otto, MD

The course comprises:

1. Pre-course video lectures addressing the basic principles of endoscopic skull base surgery, anatomy of the sinonasal tract and skull base, and basic surgical techniques and instrumentation. These will be provided to registered participants one month prior to the course, as the program will start at a level that presumes familiarity with these principles.

2. Anatomical prosections (videos will be provided one month prior to the course).

3. Laminated dissection manual (a digital version will be provided one month prior to the course)...

The OHIO STATE UNIVERSITY FACULTY

Sergio D. Bergem, MD, Professor Clinical Neurosurgery

May 14-16, 2015
Columbus, Ohio
Hyatt Regency Columbus
COURSE DESCRIPTION

At the conclusion of this activity, learners should be able to:

1. Describe the anatomic relationships of the sinonasal tract, orbit and ventral skull base from the endoscopic perspective

2. Discuss the indications and limitations of endoscopic endonasal surgery of the skull base, pituitary fossa, orbit and craniocervical junction

3. Identify how to avoid and treat complications of endoscopic endonasal surgery of the skull base, pituitary fossa, orbit and craniocervical junction

4. Describe the anatomic relationships and surgical exposure afforded by the transpterygoid approach

5. Live surgery will be transmitted directly to the auditorium where the participants may interact with the surgeons and other members of the faculty.
